EXECUTIVE SUMMARY

TITLE: \$100 BILLION ENDOWMENT FUND FOR 50 MILLION AFRICAN YOUTHS ON TECHNOLOGY DEVELOPMENT & EMPOWERMENT

INTRODUCTION:

In an era where technology drives economic development and innovation, empowering the youth of Africa with the right skills and resources is vital for the continent's progress. The \$100 Billion Youth Endowment Fund aims to provide significant financial backing to foster technology development and skill acquisition among African youth, creating a generation of innovative leaders capable of transforming their communities and nations.

BACKGROUND:

Africa is home to the youngest population globally, with over 60% of its populace under the age of 25. While this presents immense potential, it also poses challenges, including high unemployment and limited access to technology and education. With the vision of Ambassador Ifeoma Mary Ejiogu (I.M.E) to cultivate critical and creative thinkers, innovators, inventors, and manufacturers of electronics, machinery, and essential products among African youths. The goal is to create a thriving innovation ecosystem in Africa, leveraging technology to drive growth and development. To achieve this, there will be an increasing reliance on technology, and youths must be equipped with relevant skills and knowledge.

OBJECTIVES:

1. To Empower Youths Through Technology:
 - Provide funding and resources for technology startups initiated by young entrepreneurs across Africa.
 - Facilitate access to technology training programs that equip youth with essential digital skills.
2. Promote Skill Acquisition:
 - Design and implement programs that focus on both soft and hard skills essential for success in the technological landscape.
 - Encourage partnerships with educational institutions to integrate technology-focused curricula.
3. Foster Innovation and Entrepreneurship:
 - Establish incubation centers to nurture innovative ideas and provide mentorship and guidance for young entrepreneurs.
 - Support the creation of tech hubs where youth can collaborate, innovate, and access funding opportunities.
4. Enhance Regional Collaboration:
 - Create a network of youth organizations across Africa to share knowledge, resources, and best practices.
 - Promote dialogue between youth leaders and policymakers to influence positive changes in technology policies.

TARGET BENEFICIARIES:

- Young entrepreneurs aged 18-45 across Africa.
- Students and recent graduates seeking skills in technology and entrepreneurship.
- Community organizations and tech hubs engaged in youth development.

FUNDING UTILIZATION:

The \$100 Billion fund will be allocated in the following manner:

- **Overseeing Internships:** Acquiring over 10 Hectares of land to build a Technology Village to enable our youth experience knowledge and adequate technology transfer.
- **Direct Grants and Investments:** Financial support for startups and tech initiatives led by youth.
- **Training and Education Programs:** Funding for workshops, seminars, and online courses aimed at skill development.
- **Infrastructure Development:** Investments in establishing tech hubs and incubators to support young innovators.
- **Monitoring and Evaluation:** Resources dedicated to tracking the fund's impact and ensuring accountability.

IMPLEMENTATION PLAN

1. Sponsorship and Training:

USLACC Africa will sponsor youths for international training and development programs, providing internship opportunities in advanced countries for talented and inventive youths. This exposure will enable them to acquire expertise knowledge, invent, and manufacture products that meet global standards.

2. Entrepreneurship Support:

USLACC Africa will support and promote entrepreneurship among youths, including financing startups and providing funding for less privileged but skilled youths who can leverage their skills for self-reliance.

3. Scholarship Program:

USLACC Africa will offer scholarships to gifted youths still in school, promoting creativity, innovation, and talent development.

4. Technology Villages:

The long-term plan is to establish technology villages, providing a platform for youths to perfect their technology development skills and bring their innovative ideas to life.

CONCLUSION:

The \$100 Billion Youth Endowment Fund presents a transformative opportunity to empower Africa's youth through technology. By investing in skill acquisition and fostering innovation, we can unlock the full potential of our future leaders, driving economic growth and sustainable development across the continent. Together, let us build an ecosystem that nurtures young talent, inspires creativity, and leads Africa toward a prosperous future.

The Launch will be held subsequently in USA, Canada, Europe, Middle-East and Africa.

EXHIBITORS

YOUTHS WITH INVENTIVE IDEAS CAN NOW GET SPONSORSHIP FOR AN ADVANCED TRAINING AND INTERNSHIP LOCALLY AND INTERNATIONALLY FOR OPTIMIZATION AND MORE USEFULNESS TO THE SOCIETY AFTER TRAINING

STATEMENT OF FACT

Africa stands rich with diverse and abundant mineral resources assets capable of generating employment, creating wealth, and drawing global attention. Now is the time to develop the vision and discipline to wisely manage what we have been blessed with.

Let us make a collective commitment to recover the wasted years and build solid structures that will empower the next generation. By investing in our youth, equipping them with technological knowledge and practical skills, we can raise inventors, innovators, manufacturers, creators, and critical thinkers. African youth are exceptionally intelligent, equal in potential to their peers across the developed world. What they need is opportunity.

Join Ambassador Ifeoma Mary Ejiogu in driving this transformation. Together, let's ignite a new era of progress, purpose, and prosperity for Africa.
